Design Standards for School Art Facilities is an invaluable resource for any school or school district looking to build new facilities for the visual arts or renovate. It provides design guidelines and norms for school art facilities, making it a crucial reference for educators and architects. This text is particularly useful for planning a state-of-the-art school, as it requires consideration of the building and intent of its spaces. Planning a school that meets the stated benchmarks and standards within the Educational Specifications is also essential. Therefore, it is important for both design and construction professions to understand the building and its intent.
